

05. - 08.10. 2021  
Hall 1, Booth 1106

# Neat and tidy.

## The new INOX-Runner. For hygienic applications.

FDA and EG compliant.

INOX-Runner from IBC are now available in two sizes. Even more robust, even more user-friendly and even more corrosion-resistant, the existing S-LBX 45 range is completed by the new profile size 30.

It is particularly convincing for hygienic applications. For example, in the food and pharmaceutical industries or for maritime applications. If you want to see for yourself how well the Runner really run, come and visit us at Motek in Stuttgart, **Hall I, booth 1106**. We look forward to seeing you.
